Jatco

Jatco is organized by teams that have instant access to up-to-the-minute project information and full awareness of status, timelines and strategies.

Advanced Production Quality Planning (APQP)

Jatco's philosophy of customer service is reflected throughout our entire organization. Jatco embraces a policy of team management for every customer project. Each project is assigned a primary project manager and an Advanced Product Quality Planning team. The APQP team is represented by all departments including production and production planning, engineering, tooling, shipping and senior management. All members are cross-trained to provide you with the absolute best customer service and back-up support.

Production Team :

Following corporate policy, our production and production planning teams are cross-trained and current with the status of every production order. With service excellence as the focus of every member, any individual can provide accurate order status information.

At Jatco, we don't just take orders: we verify and validate them to ensure optimum delivery excellence. Our commitment to customer satisfaction goes beyond industry standard. Through strong monitoring, we provide early detection and response in the event of potential order errors or anomalies. It's a philosophy of team customer support we follow throughout the entire manufacturing process.

ISO Certification

All Jatco facilities operate in accordance with ISO standards.

Jatco facilities in China are ISO 9001,2000 and 14000 certified.

Official certification of the Union City location for both ISO 9001 and ISO 14000 is expected in early 2008.

Background :

ISO (International Organization for Standardization) is the world's largest developer and publisher of International Standards.

The ISO 9000 family addresses quality management. This means what the organization does to fulfill:

- the customer's quality requirements, and
- applicable regulatory requirements, while aiming to
- enhance customer satisfaction, and
- achieve continual improvement of its performance in pursuit of these objectives.

The ISO 14000 family addresses environmental management. This means what the

Organization does to :

- minimize harmful effects on the environment caused by its activities, and to
- achieve continual improvement of its environmental performance.
